

## How Secure Is SHS

- Safety, Security, Emergency Management Director on site.
- Crisis Response Plan in place and a copy given to every faculty member in the form of a “flip chart”.
- Periodic Crisis Response drills ( 2 Code Red, 2 Code Blue, 2 Code Yellow, 10 Fire Drills).
- Cell Phone communication with Central Office.
- Because the Police and Fire Personnel have badges that will allow them instant access, we have a fast response time.
- Utilizing SHSall e-mail.
- Utilizing “Alert Now” (email, phone call about school closing) mass notification system.
- Building is totally locked between 7:30-2:00.
- All visitors must enter through Aiphone entry system.
- All Visitors assigned temporary badges with “Passage Point” visitor managing system. This system scans a driver’s license for identification. Any person on a “watch list” will be identified if they try to enter the building and denied access.
- Security/Hall Monitors throughout building.
- Teachers stationed at exterior doors during X Block.
- Staff/Students must wear ID badges that have prox dots which will record an audit trail.
- 16 Security cameras installed which record activity to a digital format.
- Cyber Keys used at all “high security” areas.
- All issued keys are registered and signed for by applicant.
- Classroom doors have classroom security feature that will allow them to be locked from inside.
- Staff and faculty are trained to be diligent in reporting to the office visitors without proper badging.
- Defibrillator installed in gym area and by nurse’s office for emergency use.
